

CNC Mill Capabilities

DTI provides superior precision machining services with our professionally trained staff and over 45 CNC mills. This is achieved with modern CNC machines programmed and operated by experienced and dedicated machinists. With the support of our own in-house Engineering department, our CNC programmers take advantage of the latest CAD/CAM software. This enables us to program your parts to exacting specifications and tolerances.

Kuraki 700C Vertical Mill

For a complete list of all of our machining centers, browse our website at www.davistl.com.

Capable of handling a wide range of jobs, DTI provides quality services to a diverse number of industries. Ask about DTI's complete custom manufacturing capabilities.

CNC Mill Services

DTI
Quality on Time

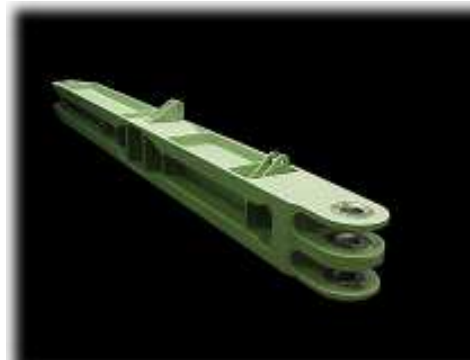

DTI Experience

For over 20 years DTI has been providing custom manufacturing of metals, plastics, and composite parts to the Pacific Northwest.

DTI provides a diverse range of precision CNC machining and value added services. Using over 45 high performance CNC horizontal and vertical centers, our experienced machinists can produce simple aluminum clips to large bulkheads. It is DTI's goal for our customers to consider DTI as a single source for a wide range of manufacturing and assembly services. With a team of full-time engineers on staff, and an in-house product support system, DTI can provide virtually all your CNC machining needs.

Mori-Seiki M300L CNC vertical mill

Whether you need a compact precision workpiece, or a larger multi-piece w/assembly machining job done, DTI is here for you to provide high accuracy and high efficiency CNC machining solutions.

Service Counts

All DTI customers are assigned an experienced Program Manager. It is the Program Manager's responsibility to act as an extension of our customer, providing a single point of contact, a constant line of communication and to insure your project objectives are met.

The Program Manager can insure DTI's full range of capabilities are used to help address your specific design and manufacturing needs:

- Project management
- Design
- On-site DFM reviews
- Project and design documentation
- Prototyping
- Purchasing
- Custom manufacturing
- Assembly & test
- Direct shipping
