Paint Services

DTI
Quality on Time

DTI Experience

For over 20 years DTI has been providing custom manufacturing of metals, plastics, and composite parts to the Pacific Northwest.

DTI's integrated Painting Department offers a variety of different services in order to meet a wide range of industry demands. From standard wet paint, to professionally dry-sprayed powder coating, DTI is committed to providing you services covering all phases of manufacturing.

With a team of full-time engineers on staff, and an in-house product support system, DTI can support almost all your painting needs whether large or small. It is DTI's goal for our customers to consider DTI as a single source for a wide range of manufacturing and painting services.

Anodized and powder coated part

Powder Coating

Baking oven at DTI Forest Grove plant

Products with a coated finish are far more resistant to scratching, chipping, fading, and wearing that comes with years of use. Powder coating offers a wide variety of colors to choose from, and the pigment remains bright and vibrant longer than conventional painting.

The types of surfaces can range from smooth to wrinkled or matted finishes, or rough textures which hide surface imperfections. Unlike paint, there is no drying or flash time required. A powder coated part will never run or drip, and results have a much lower rejection rate.

Environment & Safety

DTI regularly takes many precautions and is committed to investing in a safe and clean environment. DTI uses state of the art waste treatment and fume scrubbing equipment and abides by all local and federal safety, pollution and waste treatment laws.

The safety of our employees and consideration for the environment have always been top priorities here at DTI.

Powder coated white locking mailbox

By being able to support both turnkey systems and finishing services, DTI's goal is to provide your business with a one-stop source for all your finishing and manufacturing needs.
