

Silk Screening & Pad Printing Capabilities

DTI provides in-house silk-screening and pad printing. With the support of our engineering department, we can electronically import your CAD and/or virtually any graphic file format to produce your screening needs professionally and quickly.

Our value added in-house processes reduce costs and turn around times associated with projects needing silk screening and/or pad printing by eliminating the need to send work to additional vendors.

Capable of handling a wide range of jobs, DTI provides quality services to a diverse number of industries. Ask about DTI's complete custom manufacturing capabilities.

Silk Screening Services

DTI
Quality on Time

DTI Experience

For over 20 years DTI has been providing complete custom manufacturing of metals, plastics, and composite parts to the Pacific Northwest.

DTI's integrated Finishing Department offers a variety of different silk screening and pad printing services. These services are performed in-house, in order to provide you with a complete range of services to meet all aspects of your manufacturing needs. It is DTI's goal for our customers to consider DTI as a single source for a wide range of manufacturing and finishing services.

With a team of full-time engineers on staff, and an in-house product support system, DTI can support almost all your silk screening and pad printing needs whether large or small.

Industry requirements are beginning to force increasingly shorter lead times. DTI is meeting this challenge by eliminating as many outside processes as possible. Our Finishing department can provide painting, powder coating, chem-film, anodizing, pad printing, and silk screening.

By keeping these key processes in-house, we can shorten lead times, improving delivery and assuring the highest quality standards.

Environment & Safety

DTI takes precautions and invests to contribute to a safe workplace and clean environment. Using state-of-the-art waste treatment and fume scrubbing equipment. The company abides by all local and federal safety, pollution and waste laws. The safety of DTI's employees and consideration for the environment are top priorities here at DTI.
