

## Turnkey Solutions

### Turnkey System Design

Using the latest design systems and CAD technology, DTI's engineers will assist you in evaluating and designing a complete or partial system to meet your specific application requirements. Whether it is a large automatic assembly system or a single machined part, our group of engineers possess the experience and the solutions you can depend on.

### Solutions that Fit

If you need to increase productivity, be cost-effective, and reach higher quality standards, then our team of engineers at DTI can evaluate and recommend solutions for you to meet those goals. Your application requirements will be analyzed using the latest methods and equipment, to provide you with a custom solution.

Here at DTI, we do more than just make recommendations. We will assist you in implementing these solutions to ensure your complete satisfaction. From beginning to end, DTI offers solutions that work.

# Turnkey Assembly Services

**DTI**  
Quality on Time

## *DTI Experience*

For over 20 years DTI has been providing custom manufacturing of metals, plastics, and composite parts to the Pacific Northwest.

DTI provides a wide range of turnkey and value added services. Manufactured products range from simple items such as a molded plastic component with silk-screening to the full design and manufacture of a custom end product. It is DTI's goal to be considered as a single source for a wide range of manufacturing and assembly services.

With a team of full-time engineers on staff, and an in-house product support system, DTI can provide almost all your turnkey assembly needs, whether large or small.

### **Sub Assembly Service Categories**

- Electrical
- Pneumatic
- Hardware
- Bearings
- Mechanical
- Ultra Sonic Inserts
- Bushings
- Hydraulics

## **Design**

DTI's unique combination of designers, experienced engineers and manufacturing staff provide cost effective solutions and fast turnaround in product development. From a simple sketch on a napkin to an already refined engineering design, DTI's development staff can partner with you and turn your rough idea into a manufacturing solution. Taking the final step together, your idea will become a production reality.

## **Build**

Experience and technical expertise are just as important as having the right equipment. A staff of trained professionals at DTI are ready to assist in a wide range of build projects, depending on your specific design requirements.

## **Assembly**

DTI's "one-stop", in-house capabilities allows us to offer a variety of different manufacturing and assembly solutions.

## *Service Counts*

All DTI customers are assigned an experienced Program Manager. It is the Program Manager's responsibility to act as an extension of our customer, providing a single point of contact, a constant line of communication and to insure your project objectives are met.

The Program Manager can insure DTI's full range of capabilities are used to help address your specific design and manufacturing needs:

- Project management
- Design
- On-site DFM reviews
- Project and design documentation
- Prototyping
- Purchasing
- Custom manufacturing
- Assembly & test
- Direct shipping
